

Ethos universal wallet is the world's most advanced crypto wallet for 100+ cryptocurrencies. It securely stores, sends, receives, tracks and learns about cryptocurrencies operating in the market in real-time.

## Features

- Lets users store crypto tokens, coins, and digital assets on multiple blockchains seamlessly
- State-of-the-art security with a single Ethos SmartKey for each wallet instance the users create
- Lets users track assets they have stored somewhere else - such as on a hardware wallet or an exchange
- Users have access to powerful coin analytics that combine raw data, key facts and social intelligence with technical analysis, market performance, ratings, and more
