

Monetha is a go-to reputation platform for the e-commerce industry, which aims to make the online purchases safer. It helps sellers to show off their excellent reputation with personal online identity and sellers to make deals with confidence with the help of verified reviews and instant receipts.

## Web App Features

- Allows people to build trust as an online seller with verified reviews and reputation points on their profile
- Has smooth integration of smart contracts to increase operational efficiency by regulating the intermediaries in the transaction cycle
- Another core component is a web app for the users to verify if an ICO is legitimate using AI/ML algorithms
