

This all-inclusive payments application was developed with the intent to revamp the payment processing industry and provide an incentive for data ownership to consumers and businesses. This app works on minimizing malicious activities in the payment processing platforms and maximizes positive contributions with a unique governance protocol - Proof-of-Contribution (PoC).

## Web App Features

- Provides an all-in-one commerce solution to get started right away
- Option to receive and send payments either in fiat or cryptocurrencies
- Decentralized AI-based reputation system governed by its own users and partners
- Seamless integration across all shopping cart plugins - Shopify, WooCommerce, and more
- A powerful analytics engine designed to help improve sales processes, inventory management, marketing strategies, and consumer outreach
