

[WOO]

The Woo mobile app helps users plan date nights their boo will love. Woo is built on the idea of presenting their users with a connection that's full of love, excitement, & romance in the era where relationships are challenging. It works on the vision of creating a world where people place more value on the success of meaningful relationships.

Features

- Date ideas based on user and their boo's interests and unique relationship needs
- Provides users accurate recommendations based on activity selection
- In-built calendar to save important dates and provide the users with a rich user experience
- Users can earn Brownie points by completing ratings on their finished Woo experiences
